

whoami

I'm currently working to obtain the Google Cybersecurity Professional Certificate, where I'm developing technical competencies in areas such as network security, threat analysis, and incident handling. My journey into cybersecurity has been fueled by a passion for problem-solving, collaboration, and risk management.

In my role as a Shift Supervisor at West Virginia University Dining, I coordinated tasks among student and full-time employees to maintain a smooth workflow during peak hours. This experience honed my problem-solving skills, as I regularly utilized data analysis to identify operational inefficiencies and implement targeted improvements. For instance, my ability to enhance team productivity through effective communication and coordination translates seamlessly to managing cybersecurity threats and incidents.
